

Dr. Loren Groff
Transportation Safety Analyst
National Transportation Safety Board
Office of Research and Engineering

Loren Groff, Ph.D. is a National Resource Specialist for Safety Data Analysis in NTSB's Office of Research and Engineering, Safety Research Division. He assists accident investigations, conducts safety data analyses, and manages research projects on transportation safety issues. He is the technical lead for the NTSB aviation accident database and regularly represents the NTSB and U.S. in domestic and international efforts involving safety data sharing and analysis. He is a certificated flight instructor and former pilot with a regional airline. Dr. Groff received his Ph.D. from Wichita State University in Human Factors Psychology.
